SCS Global Services does hereby certify that an independent assessment has been conducted on behalf of:

ECORE International

715 Fountain Ave, Lancaster, PA, United States

For the following product(s):

Rubber Tile and Roll Goods:

ECOSurfaces, ECOsurfaces with ECOguard, Everlast, Playguard, QT, Training Ground, UltraTile

This product meets all of the necessary qualifications to be certified for the following claim:

FloorScore®

Indoor Air Quality Certified to SCS-EC10.3-2014

Conforms to the CDPH/EHLB Standard Method v1.1-2010 (effective January 1, 2012) for the school classroom and private office parameters when modeled as Flooring.

Measured Concentration of Total Volatile Organic Compounds (TVOC): Between 0.5 – 5.0 mg/m³ (in compliance with CDPH/EHLB Standard Method v1.1-2010)

Registration # SCS-FS-01793

Valid from: October 1, 2014 to December 31, 2015

SCS Global Services is currently the only certification body approved by the Resilient Floor Covering Institute (RFCI) to provide FloorScore® product certification; certified products are only listed on the SCS Green Products Guide, <http://www.scsglobalservices.com/certified-green-products-guide>.

Product Safety Data Sheet Everlast Flooring

1. Identification of the product and manufacturer	1.1 Product Name: Everlast Basic Rolls & Tiles, Ultra Tiles, Regrind 1.2 Company Details: ECORE International Inc. P.O. Box 989, 715 Fountain Avenue, Lancaster, PA 17601 Phone: 717.295.3400 Fax: 717.295.3414
2. Hazard(s) identification	These products are non-hazardous
3. Composition / Information on ingredients	There are no substances in this product presenting a health or environmental hazard within the meaning of the Chemicals (Hazard Information & Packaging for Supply) Regulations
4. First aid measures	Inhalation: no specific measures required Skin contact: no specific measures required Eye contact: no specific measures required Ingestion: no specific measures required
5. Fire fighting measures	5.1 Suitable extinguishing media: Water spray jet, foam, dry powder, carbon dioxide 5.2 Extinguishing media that MUST NOT be used: Not applicable 5.3 Special exposure hazard arising from combustion products, resulting gases: carbon monoxide, hydrogen chloride, sulfur oxides, nitrogen oxides, aromatic hydrocarbons, PAH's, particulate matter, ozone, heavy metals. 5.4 Special protective equipment for fire fighting: Use respiratory protection independent of recirculated air.
6. Accidental release measures	6.1 Personal precautions: No special measures required 6.2 Environmental precautions: No special measures required 6.3 Methods for cleaning up: Dispose of according to regulations
7. Handling and storage	7.1 General information: No special protective measures required 7.2 Handling: Normal safe handling practices must be applied 7.3 Storage: Rolls should be stored horizontally
8. Exposure controls / P.P.E.	Personal protection equipment: None required
9. Physical & chemical	Appearance: various designs and colors, made with black recycled rubber and colored rubber chips
10. Stability and reactivity	10.1 General information: If stored and handled in accordance with standard industry practices, no hazardous reactions are known 10.2 Hazardous decomposition information: Thermal decomposition in the presence of air may yield hydrogen chloride gas, carbon dioxide and carbon monoxide
11. Toxicological information	11.1 General information: No harmful effects have been reported to date Inhalation: not applicable Skin contact: no known hazard Eye contact: not applicable Ingestion: not applicable
12. Ecological information	12.1 Environmental fate and distribution: The floorings have no mobility in soil; are insoluble in water; are not expected to bioaccumulate 12.1 Persistence and degradability: The floorings will not biodegrade
13. Disposal considerations	Dispose of in accordance with local and national legislation
14. Transport information	The floorings are not classified as dangerous for transportation
15. Regulatory information	The floorings are defined as "not hazardous" in the Chemicals Hazard Information and Packaging regulations (CHIP3)
16. Other information	ECORE International provides a Product Safety Data Sheet (PSDS) for finished floor covering products based on the "article exemption" found in 29 CFR 1910.1200 (b) (6) (v). An article is defined as: "a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has an end use function dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use, does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees."

Disclaimer: Although the above information is presented in good faith and believed to be correct as of the current date, ECORE International gives no guarantee and disclaims responsibility for individual items being incomplete or incorrect. Furthermore, ECORE gives no guarantee that all possible measures are contained within the safety data sheet (including exceptional circumstances)

[Shooting Facilities](#)

[Bowling Lanes](#)

At least one of each type of exercise equipment or machine must have clear floor space of at least 30 by 48 inches and be served by an accessible route. If the clear space is enclosed on three sides (e.g., by walls or the equipment itself), the clear space must be at least 36 by 48 inches.

Most strength training equipment and machines would be considered different types. For example, a bench press machine is different from a biceps curl machine. If operators provide both a biceps curl machine and free weights, both must meet the guidelines in this section even though both can be used to strengthen biceps. Likewise, cardiovascular exercise machines, such as stationary bicycles, rowing machines, stair climbers and treadmills, are all different types of machines. But if the only difference in equipment provided is that they have different manufacturers, but are the same type, only one must comply.

Clear floor space must be positioned to allow a person to transfer from a wheelchair or to use the equipment while seated in a wheelchair. For example, to make a shoulder press accessible, the clear floor space should be next to the seat. But the clear floor space for a bench press designed for use by a person using a wheelchair would be centered on the operating mechanisms. Clear floor space for more than one piece of equipment may overlap. For example, where different types of exercise equipment and machines are located next to other pieces of equipment, the clear space may be shared. (See figure "Clear Space Requirements Around Exercise Equipment" on page 12.)

The exercise equipment and machines themselves do not need to comply with the ADAAG requirements regarding controls and operating mechanisms.

Designers and operators are encouraged to select exercise equipment that provides fitness opportunities for persons with lower body extremity disabilities.
